- ✓ **Backend:** Node.js, Express.js, MongoDB, Redis
- ✓ **Cloud & Databases:** Firebase, Supabase, AWS, Appwrite, Convex
- ✓ **DevOps:** Docker, Kubernetes, WebSockets, WebRTC
- ✓ **Others:** Kafka, Testing, Grafana

---

## PROFESSIONAL EXPERIENCE

### Vision Genius (Think Transportation)

Senior Full Stack Developer | February, 2025 - present

- Developed and maintained scalable web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js) to deliver high-performance solutions.
- Optimize application performance by improving database queries, implementing caching strategies, and enhancing frontend rendering
- Integrate third-party services and APIs, including authentication, payment gateways, and real-time data processing

### Strugbits

Technical Team Lead | October 2024 - December 2024

- Led a team of developers to build and optimize full-stack applications, ensuring high performance, scalability, and maintainability.
- Mentored junior developers by conducting code reviews, improving development workflows, and fostering a culture of collaboration and continuous learning.

### SeamlessIdeas

Full Stack Developer | August 2021 - August 2024

- Built and maintained websites for clients through various online platforms
- Worked closely with UI/UX designers to translate mockups and wireframes into pixel-perfect web applications, ensuring a seamless user experience.
- Worked closely with backend developer to integrate APIs and doing state management for better user experience.

## New Vision Institute of Technology (NVIT) • Part-time

Frontend Developer | January, 2022 - December, 2022

- Oversee and maintain core web services and websites
- Write well-designed and efficient code by using the best software development practices
- Collaborate with senior developers to update the website and create new features

## BNG Labs

Junior Web Developer | June 2020 - August 2021

- Developed and implemented responsive user interfaces using HTML, CSS, and JavaScript, ensuring compatibility across multiple browsers and devices.
- Collaborated with cross-functional teams to design and deploy web applications, focusing on user experience and functionality.
- Part of regular code reviews and refactored existing codebase to improve performance and maintainability, resulting in enhanced product stability.

---

## RELEVANT PROJECTS

---

### NVIT Website ( A marketplace for products, talents, students , teachers )

- Develop a complete Frontend collaborating with the UI/UX design team.
- Integrated data from back-end services and databases
- Built a high-performing website to increase traffic
- State management and persisting data using redux-toolkit.

### Kladot Website ( Platform for foreign students to pay tuition fees in united states )

Note: This website can be viewed using VPN as this is not available for Pakistani Students

- Develop a complete Frontend collaborating with the UI/UX design team.
- Integrated data from back-end services and databases
- Built a high-performing website to increase traffic
- State management and persisting data using redux-toolkit.

### Mosjra E-commerce Website ( Site Build Using NextJS and Sanity )

- Developed Frontend According to the design
- Developed and Integrated data from back-end Sanity.io and Postgress database
- Integrated Stripe payment method for secure checkout
- State management and persisting data using redux-toolkit.

---

## EDUCATION

---

### 2019-2020 | Aptech (vocational training provider)

1 year web development diploma

### 2017-2019 | Govt City College

High School (pre engineering)

### 2016 | Happy Palace Grammer School

Secondary School

---
